### Abstract

*The aim of the proposal is to realize two business scenarios (combining four business interest partners) along the data value chain. Each of them addresses aspects of Linked (Open) Data management, which are challenged by the fact that Linked Data sets, open or corporate, for whatever reasons (technology, costs of human labor etc) are very noisy. In the project we will develop and provide a library of services that bring together human and computational intelligence to identify and solve quality issues along the Linked Data Life Cycle. These services will be added to data management solutions available at Brox, SWC and Ontos and further customized and evaluated those two business scenarios. The result will be a set of technologies for quality mechanisms, covering the full data value chain for Linked Data which is needed in various sectors. New and/or optimised products and services along the data value chain - either for the ICT vendors as well as for the business partners are the final outcome of QROWD.*

## 5 - Call specific questions

### Open Research Data Pilot in Horizon 2020

If selected, all applicants will participate in the [Pilot on Open Research Data in Horizon 2020](#)<sup>1</sup>, which aims to improve and maximise access to and re-use of research data generated by actions. Participating in the Pilot does not necessarily mean opening up all research data. Actions participating in the Pilot will be invited to formulate a Data Management Plan in which they will determine and explain which of the research data they generate will be made open.

Applicants have the possibility to opt out of this Pilot and must indicate a reason for this choice.

Participation in this Pilot does not constitute part of the evaluation process. Proposals will not be evaluated favourably because they are part of the Pilot and will not be penalised for opting out of the Pilot.

We wish to opt out of the Pilot on Open Research Data in Horizon 2020.

Yes

No

<sup>1</sup> According to article 43.2 of Regulation (EU) No 1290/2013 of the European Parliament and of the Council, of 11 December 2013, laying down the rules for participation and dissemination in "Horizon 2020 - the Framework Programme for Research and Innovation (2014-2020)" and repealing Regulation (EC) No 1906/2006.

### Data management activities

The use of a [Data Management Plan \(DMP\)](#) is required for projects participating in the [Open Research Data Pilot in Horizon 2020](#), in the form of a deliverable in the first 6 months of the project.

All other projects may deliver a DMP on a voluntary basis, if relevant for their research.

Are data management activities relevant for your proposed project?

Yes

No

A Data Management Plan will be delivered  
(Please note: Projects participating in the Open Research Data Pilot **must** include a Data Management Plan as a deliverable in the first 6 months of the project).

Data Management is part of a Work Package.

Data Management will be integrated in another way.
